

# Malin Enström

## Artist's Statement:

Through photography, I strive to reveal and to celebrate the unexpected shapes, surfaces, patterns, and textures that exist in objects and landscapes. I explore the relationships of how lines can flow in natural and constructed environments, and how the softness of lines can create contrast with the colors and textures of surfaces.

I work with natural light to capture the mood, the spirit and the personality of the scene, be it people, objects or landscapes. I seek to find everyday life events and scenes that I live in, myself, and that I love. I believe there is beauty and meaning in everyday visions, and that they are easy to overlook if one's attention is not drawn to them. I make art to reveal the hidden in plain sight. I make art to draw attention to stories that can be mistaken as background noise.
